## performance

The SERVO 7000 Pellet Mill is a compact workhorse that just keeps running. A fine-tuned design that offers highly efficient pelleting. The SERVO 7000 combines the best of current pellet mill technology with proven features from our long-established family of gear-driven pellet mills, offering the highest output per kWh in its class

## engineering

Robust, easy-to-maintain design. Single-reduction, precision helical gearing delivers quieter operation.

The SERVO 7000 Pellet Mill utilizes a single motor and a positive direct gear drive that boasts 98% power transfer for efficiency you'll see on Day One.

## standard features

Compact profile, small footprint, modular design - makes the mill easy to fit into your facility. The die-area-to-kW combinations provide increased efficiency and throughput, ensuring that there are fewer blockages, and providing longer die life. Shear pin hub array - protects the shaft against foreign objects.

## key features

Clamp-on die for fast die change. Modular gearbox design for production flexibility. Replaceable quill flange. Stainless steel pellet chamber. Automatic grease system. Two-roll main shaft for maximum capacity and efficiency. Automation software to operate and control SERVO 7000 Pellet Mill.
