

Servoday Group Presents

DRUM CHIPPER

WOOD LOGS - SAW MILL WASTE - BIOMASS RESIDUE

SERVODAY horizontal feed Rotary Drum Chipper Shredder offer comprehensive solution for your Chipping, Grinding, shredding and Processing needs.

Full range of sizes available to process from 1 to 20 tons per hour. SERVODAY horizontal grinder systems deliver superior processing performance while minimizing maintenance & horsepower requirements.

The horizontal feed design allows for easy handling of long and bulky piece size material. Wood & Biomass material is loaded on the infeed conveyor to SERVODAY's revolutionary powered feel roll which provides a metered, controlled feed to the grinder. Automatic load sensing maximizes thru-put and improves the handling of surge conditions.

- Optional infeed control unit (current limiter) automatically senses load to the grinder and helps maximize production rates.
- Infeed conveyor transports material to the powered infeed mechanism. Conveyor options include vibrating, belt, and chain. Vibrating conveyors can be provided with metal detection, fines screening, and removable infeed transition. Belt conveyors include a 'speed-up' roll for extended wear life. Large grinding systems use our multi-strand chain conveyor for direct loading of batch loads and reversing capabilities.

- Heavy-duty base with motor mount for single or dual drive motor(s).
- Options: Motor starter control package, Discharge conveyor with magnetic head drum.
- Inspection ports and rear access doors allow access to upper and lower housing.
- Automation System with PLC and HMI.
